

# The Water Cycle - Cause and Effect - Matter and Energy

Name: \_\_\_\_\_

Use your Water Cycle Diagram to find 4 examples of how water might move from one location to another. What would cause this movement? Would there be any effect? Would the state of matter change?

## Before

**Puddle on sidewalk.**

## After

**No puddle.**

Cause: Heat from the sun warms up a puddle.

Effect: Water evaporates and the puddle disappears. Liquid water becomes gas.
